Glossary — English and Spanish

Every Spanish form below is attested in the official Spanish edition of *Magnifica Humanitas*. None was chosen by preference or recalled — each was checked against `vatican.va/content/leo-xiv/es/encyclicals/documents/20260515-magnifica-humanitas.html` (2026-10-06). Where the Holy See has settled a term, that settlement is authoritative and we adopt it rather than inventing a better rendering.

Companion to §2.3 of the translation standard. Where the Holy See has settled a term in Spanish we adopt its rendering, and these are the terms settled so far. Holding to them is what keeps the pages reading as one publication rather than as a series of independent pieces.

Adding a term

A term is added only after it has been checked against the official Spanish text, with the source paragraph recorded beside it — an unchecked entry would carry more authority than it had earned.
